

Registry Solutions

The World Revolves Around Information

ISC is the leading provider of registry and information management services for public data records.

ISC is at the forefront of information management, services and solutions.

As the leading provider of registry and information management services for public data and records, ISC is the partner of choice for governments and private sector organizations seeking management of their information with confidence.

We help our clients optimize how they do business.

We provide service and technology solutions to secure, manage and administer their most valuable information. These capabilities are anchored by an industry-leading customer experience, and our commitment to providing personal, professional service and support – in-person and online.

We are committed to putting the right information, in the right hands, at the right time.

Because we understand it's not just the information that matters – it's what that information can do for you.

A Diverse Range of Registry Solutions

ISC is proficient in developing policies and procedures to maintain the integrity of an organization's data; in administering a registry's information technology, data management, and authentication processes; in simplifying and expediting how customers interact with registry information; and in designing customized registry systems and processes in select industries.

By working with governments in deep and long-standing partnership, ISC has developed solutions across the spectrum of full-service registry delivery to help address their needs and challenges.

- Our advisory services are based on our unique history with statutory registries.
- Our technology solutions can help drive operational transformation.
- Our clients trust us to act on their behalf to operate and manage their processes.

Registry Solutions

Understanding Government

ISC began as an essential program of government. The Company has comprehensive knowledge and experience in every aspect of government decision making and fiscal responsibility. Critical to the enhancement of government registry systems is the understanding of how to enhance the end user experience and reduce risk as registries progress through modernization to new age operation. Renewal of registries must address technology, policy, legislation and change management, all unique competencies of ISC, borne from its history of managing and operating registry systems on behalf of the Government of Saskatchewan.

Leading Registry Technology

ISC has in-depth experience in the development and implementation of registry solutions. Since 2002, ISC's wholly-owned subsidiary Enterprise Registry Solutions Limited (ERS) has been recognized as a global leader in the advancement and innovation of technology solutions for registries. Through its proven registry product RegSys, ERS has enabled the transformation of registry operations for public sector organizations around the world. RegSys provides a readily transferable technology platform capable of serving a wide range of registry needs.

Registry Expertise

In addition to its leading registry technology solutions, ISC has decades of collective experience in the operation of registry systems. Competencies in policy, legislation and government decision-making systems provide ISC with a unique understanding and skill set in support of clients seeking new service and technology solutions.

Understanding end user requirements related to processes and technology is a key competency. ISC possesses broad registry domain knowledge which includes the operation of land, personal property security and business registry systems. Specific features of our registry development expertise position ISC as knowledge consultants to address challenges such as the linkages of land ownership and the land survey systems.

Stable Long-Term Partnerships

ISC's long term partnership approach has consistently led to high customer satisfaction ratings. The lengthy partnership with the Government of Saskatchewan has demonstrated the advantage of this model, with outcomes clearly exceeding expectations throughout the development of the suite of technology driven registries. The customer support model utilized by ISC ensures continuous delivery of preferred outcomes over the long term.
